

# Coding InSight for Providers

## Streamline Risk Adjustment Coding for Improved Accuracy and Better Care Planning

Risk adjustment coding processes are highly manual, requiring retrospective chart reviews that are time-consuming, error-prone and costly. Coding InSight by Talix automates this complex process so that provider organizations and accountable care organizations can improve coding and documentation accuracy, ensure more accurate risk scoring, successfully manage value-based reimbursements, and deliver more comprehensive care plans for Medicare Advantage and Commercial populations.

Powered by our Talix platform, Coding InSight combines the power of machine learning with proprietary natural language processing (NLP) technology, a sophisticated clinical rules engine and a rich medical taxonomy to accurately identify missed or inaccurate condition codes in patient data. It then makes code recommendations based on evidence found in the data, such as documented diagnoses or treatments in unstructured free-text care plans, historical chart notes and specialist reports. Clinicians and professional coders, as a result, can quickly close coding gaps at the point of care.

### Key Benefits

Uncover missed condition codes and documentation gaps	Increase coding accuracy and efficiency—Improve productivity by <b>2-3X</b>	Identify high-risk patients and improve care planning	Improve risk score accuracy by <b>15-20%</b>	Ensure more accurate reimbursements
---	---	---	--	-------------------------------------

### Powerful Features for Today's Clinician

<b>Prospective, Concurrent and Retrospective Coding</b>	Review code recommendations prospectively for better care planning, at the point of care during patient visits, or retrospectively after claims submission
<b>High-Accuracy Risk Scoring</b>	Accurately identify high-risk patients based on the patient's Risk Adjustment Factor (RAF) score—calculated in real-time—and deliver timely interventions
<b>Analytics and Reporting</b>	Gain real-time, actionable insight on coding performance to better manage the financial impact from risk adjustment and reduce audit risks
<b>Workflow Integration</b>	Seamlessly integrate Coding InSight with your organization's EHR and other coding applications for easy workflow integration and improved user productivity

## Partnering with Leading Organizations

“Coding InSight has transformed the coding and risk adjustment processes for Village Family Practice. It has improved not only coding efficiency, but more importantly, the level of care we’re able to provide to our patients. As a practice, we are now coding for care rather than for dollars”

— Clive Fields, MD, President, Village Family Practice

### About Talix

Talix provides risk and quality solutions to help providers, payers and accountable care organizations address the growing challenges of value-based healthcare. Our leading-edge SaaS applications leverage machine learning and advanced patient data analytics to transform complex data into actionable intelligence that drives improved coding efficiency and accuracy—leading to better patient outcomes, more accurate reimbursements and reduced costs.

### Coding InSight for Providers

Improve coding and documentation accuracy to deliver better care planning, ensure accurate risk scoring and successfully manage value-based reimbursements

### Coding InSight for Payers

Streamline time-consuming, error-prone manual chart reviews to increase coder accuracy and productivity, and improve financial performance
