How it Works

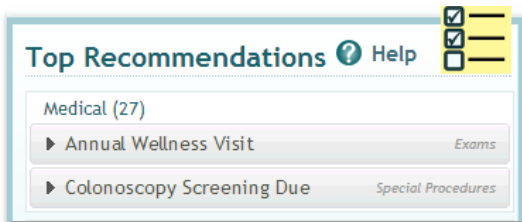

eDoc4U’s award-winning, NCQA-certified population health management solution uses bi-directional integration to transform Allscripts EHR data to connect and empower your patients.

The patented, cloud-based eDoc4U platform increases practice revenue and improves care quality by automating health assessments. eDoc4U also engages patients in personalized health programs, enhances provider productivity, and identifies gaps in care.

Before or during an office visit, patients complete their health assessment, building on EHR information automatically integrated by eDoc4U and Allscripts. eDoc4U immediately delivers the evidence-based Health Summary Reports to your patient’s medical record.

Your patients also have access to the eDoc4U Personal Health Manager:

- Prioritized Disease Risk Index based on EHR data
- Recommendations for preventing disease and for managing chronic conditions
- Personalized Health Awareness Programs with videos and action plans

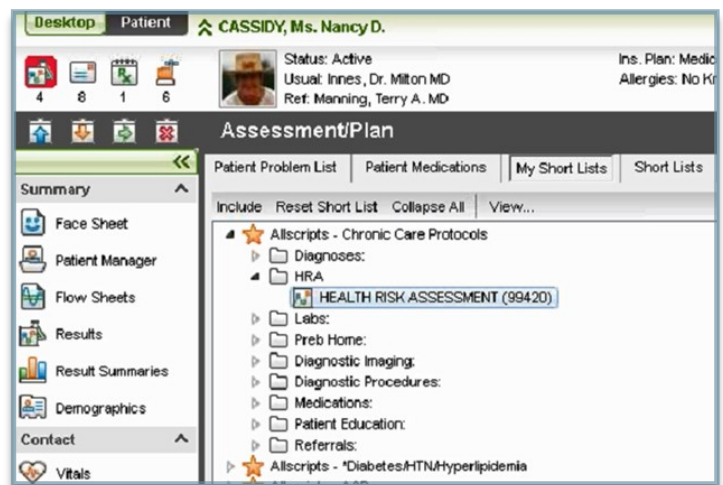

Identify Gaps in Care

- Use eDoc4U to scan a patient’s medical record for gaps in care
- Leverage evidence-based medicine to identify Medical Recommendations and improve care
- Position your practice for value-based care incentives and higher revenue
- View the eDoc4U Health Summary Report within the patient’s medical record

Medicare Annual Wellness Visits

- Automate the Medicare Annual Wellness Visit (AWV)
- Position your practice for Medicare reimbursement and support PCMH objectives
- Post results from the AWV to the patient’s Medical Record in Allscripts EHR
- eDoc4U’s AWV questionnaire adheres to the CDC requirements (ACA Section 4103b)

Key Features

- Personalized Health Awareness Programs identified through EHR integration
- Preventive care education programs prioritized by individual disease risk level
- Medicare Annual Wellness Visit automated for patients age 65+
- eDoc4U Health Summary Reports posted in the patient medical record for provider review
- Certified 6th grade readability level
- 508(c) compliant for the hearing and visually impaired
- Physician Videos
